

# TRACK CAM AFRICA<sup>®</sup>

## YOUR EYES ON THE ROAD

LET US BE YOUR EYES ON THE ROAD  
WHILST YOU CONCENTRATE ON GROWING  
YOUR COMPANY

## ■ ABOUT US

### *OUR PASSION IS WHAT MAKES US DIFFERENT*

**With over 30 years of industry experience you can now have complete peace of mind that we can be your eyes on the road whilst you concentrate on growing your company.**

We exist, we do what we do, and we are passionate about what we do because we want to make a difference in our customer's lives and their companies. Our core motivators are to: increase passenger and driver safety; increase employee and vehicle productivity and effectiveness; save on your expenses and lower your risk.

With our range of innovative offerings, we will keep you informed on every move that your vehicle and driver make. Use our integrated system to manage, evaluate and analyze the data of your assets.

We are passionate about customer service and thrive on building close customer relationships so that we understand your specific needs.

# ■ OUR SOLUTIONS

## MANAGE | EVALUATE | ANALYSE

Our state-of-the-art system build includes multiple upgradable modules for monitoring and managing your fleet, offering full scalability and integration. Start making the best decisions for your company based on real-time data.

Track Cam Africa is prepared for the future of 4G and 5G networks. We have made the switch to 4G LTE video telematics and tracking devices to ensure that management of your fleet will continue, uninterrupted, when 3G networks are shut down. Let one of our experienced team members walk you through tailor made options structured specifically for your needs, enabling you to drive your business into the future.

## ■ FLEET MANAGEMENT

Our state-of-the-art Fleet Management System, user-friendly interface and app has been developed by an international, first world organisation and is a must-have for any company wanting to reduce expenses, increase effectiveness, enhance productivity and manage risk. Access your fleet easily and quickly from your mobile device, laptop or desktop. Our application is ideal for any industry regardless of your fleet size. From heavy plant/equipment, tractors, cane haulers, delivery vehicles, truck-trailers, company fleets, busses and taxis, we can offer you state of the art tracking and fleet management solutions. Our offerings are cost effective for smaller business and completely scalable for larger ones.

## ■ CAMERA SOLUTIONS

Installing a top-quality camera system is imperative. Camera systems installed into vehicles capture exactly what is happening inside and outside the vehicle. They supply valuable evidence during accidents and criminal investigations, thereby protecting both passengers and drivers. 4G units allow operators to watch their drivers live, 24 hours a day, by simply logging on to our interface.

## ■ TEMPERATURE & DOOR SENSORS

By installing a Fleet Management System with a temperature sensor for cargo and door-opening sensors, you will be able to:

- Prevent loss of cargo with Temperature control alarm monitoring
- Receive temperature reporting
- Completely eliminate unauthorized opening of doors
- Provide transparency in cargo delivery
- Put a stop to cargo theft

## ■ FUEL MANAGEMENT SOLUTIONS

Never-ending fuel increases and an upsurge in diesel theft has a huge impact on operational expenditure. Lower your risk by putting a STOP to siphoning, skimming and diesel spills! You can achieve this by installing one of our anti-siphoning products or a fuel probe, which will allow monitoring and reporting on fuel levels, as well as push notifications.

# ■ OUR DIFFERENCE

Our user-friendly platform offers single sign-on capability with no delays. From there you can view your tracking, cameras, fuel and any other solutions and functionality that you have enabled. View your online live video footage instantaneously with no system delays.

## **24/7 ASSIST LINE**

Total peace of mind knowing that your assets, loved ones and employees are safe with our 24/7 Assist Line.

## **GARM**

Manage your alert notifications and create your own alert algorithms to handle specific situations.

## **MULTIPLE REPORTS & ANALYTICS**

Receive Reports daily or generate your own customised reports instantly.

## **AUTOCONDUCTOR SOLUTION**

A camera solution that provides a calculation of revenue, making it impossible for drivers to take proceeds.

## **SARS LOG BOOK & ECO DRIVING SOLUTION**

Perfect for companies that have representatives on the road and provides many benefits to both the employee and the employer.

## **TASK MANAGER & LOGISTICS**

Track the status of orders/tasks in online mode and track how/when orders are fulfilled, or adversely when a violation in order dispatching has occurred.

## ■ CONTROL ROOM AND BUREAU SERVICES

Installing cameras, fleet management and fuel management solutions into your fleet will ensure that you are in complete control of your vehicles and drivers. It will have a direct impact on your bottom line, optimize effectiveness and increase productivity, ensuring the safety and security of your driver's, passengers and loads. However, installing these measures will not be as effective without monitoring and reporting on the results. Accurate and timely reporting will ensure that corrective measures can be put into place as early as possible, and, in the case of accidents, will supply you with invaluable evidence. This is where we can assist!

**Track Cam Africa operates an in-house Control Room and Bureau Service, with dedicated, experienced Operators to cater to all your company's needs. It also allows authorized company employees access to our control room platform. This means immediate online access to all your video footage and reporting and allows your footage to be saved for 5 years.**
